202 North 21st Street

Philadelphia 3, Pa.

Here's Our New Home at 202 - 206 North 21st Street, Philadelphia 3, Pa.

Phone: LOcust 4-1845

It occupies half a city block on Race Street and is conveniently located to transportation facilities which is an important factor to quick service. The layout of the plant is based on a scientific approach toward assembly-line efficiency. New labor saving equipment is expected to speed up service from the time the order is received until the goods reach the shipping department in the rear of the building. Among the office innovations is a completely mechanized addressing system of the latest design which is bound to speed up all shipments besides making sure that they are correctly addressed.

We are fully aware that you as a commercial grower must have not only prompt and efficient service but the most highly perfected strains of seeds and bulbs, as well as the best accessories. Of all factors, quality comes first and our staff of experts is ever on the alert to insure extra quality no matter what the goods. Neither time nor expense is spared to supply Dreer customers with the best merchandise available anywhere at prices which are decidedly fair and reasonable. In many instances the prices quoted are no higher than those asked for average goods yet quality seeds, bulbs, and supplies invariably are the cheapest in the end.

CONDITIONS OF SALE

PRICES—Effective Jan. 1, 1948, this catalog cancels all previous offers. The prices quoted in this Wholesale Catalog are net except that on Flower Seeds and Vegetable Seeds we offer a 5% DISCOUNT if remittance accompanies the order. All other goods are net. On charge orders we allow a CASH DISCOUNT of 2% when bills are paid within 10 days from date of invoice.

All goods are offered subject to crop failures, shortages, or other causes beyond our control and to being unsold on receipt of order, and we reserve the right to change prices without notice.

No charge is made for boxes or packing, nor for delivery to Freight Depots or Express Offices in Philadelphia.

If the goods to be shipped require the payment of a sales, use, or other tax, add the correct amount to your remittance.

REMITTANCES should be made by Money Order or Bank Draft in amount sufficient to cover the complete order. Where it is not possible to obtain these, the letter should be registered. We cannot be held responsible for money sent in any other way. **WE DO NOT SEND PERISHABLE GOODS C. O. D.**

If an account is desired please furnish three references, preferably in the trade, with whom you have had credit relations and give us time to investigate.

NON-WARRANTY—Henry A. Dreer, Inc., gives no warranty, express or implied, as to the productiveness of any seeds or bulbs it sells and it will not be in any way responsible for the crop. Our liability, in all instances, is limited to the purchase price of the seeds or bulbs.

In filling out your order always give **Shipping Directions**, and write **Name and Address Plainly** on every order.

FLOWER SEEDS are sent Postpaid.

VEGETABLE SEEDS excepting Beans, Peas, and Sweet Corn are sent prepaid. They are forwarded transportation paid anywhere in the United States, we reserving the right to ship by Parcel Post, Express, or Freight.

ALL OTHER GOODS offered in this catalog are quoted f.o.b. Philadelphia which means that customer pays transportation charges.

SHIPPING—All shipments are made at purchaser's risk, our responsibility ceasing after we deliver in good order to transportation company. Claims for shortages, etc., must be made within 5 days of receipt of goods.

CANADIAN SHIPMENTS—Flower Seeds are sent Postpaid. The complicated regulations concerning the shipment of Vegetable Seeds into Canada force us, much to our regret, to decline all orders of Vegetable Seeds from Canada. All other goods are quoted f.o.b. Philadelphia. Patrons who wish to import bulbs, corms, tubers, rhizomes, roses, etc., must secure a permit from the Department of Agriculture, Ottawa.

Three Superb 1948 Award Winners

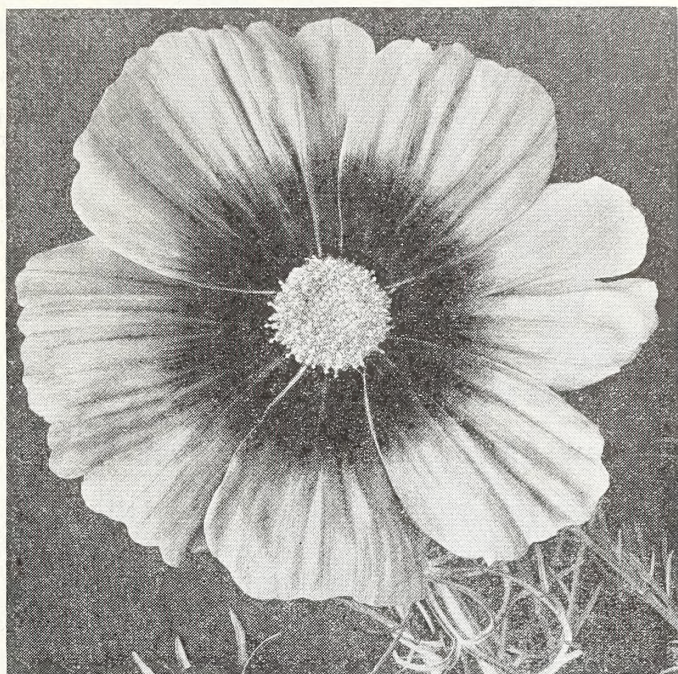

All America Selections of Flower Seeds

Silver Medal Winner

2059 **COSMOS**

Radiance

This is by far the most gorgeous Cosmos we have ever seen. The individual flowers are fully 4 inches in diameter if grown in good soil and the broad over-lapping petals make them fully round. The color is an intriguing deep rose with the lower third to one-half of the petals accentuated by a deep rich crimson blotch of velvety texture. It belongs to the early-flowering Sensation type growing 4 feet tall and branching freely into rounded bushes simply covered with blooms during the summer and early fall. Makes a magnificent garden display and is superb for cutting. Trade pkt. 50c; $\frac{1}{4}$ oz. \$1.00; oz. \$3.50.

Cosmos, Radiance

Bronze Medal Winner

3348 **Petunia, Pink Sensation**

There's something indescribably beautiful about this 1948 All America Winner. The plants grow about 24 inches tall and fully as much in diameter. The bushy and vigorous plants are a sight to behold when covered throughout the summer and fall with so many large, well-formed flowers that hardly any foliage is visible. The color of the blooms is a uniform light rose pink, as clear and pure as ever seen. Like other Petunias, Pink Sensation is excellent for garden display but if cut with a little care it is as showy for vase display as anything the gardener could select. Packets only, 40c.

Petunia, Pink Sensation

Marigold, Redhead

Bronze Medal Winner

2955 **Marigold, Redhead**

Your 1948 flower garden will not be complete without this impressive new Crested French Marigold. It is by far the most vividly colored of them all with large single blooms of a bright red which scintillates in full sunlight and turns to bronzy-red as the blooms age. The heavy crested center petals are edged and tipped with brown and gold, a color combination which greatly adds to the beauty of the blooms. Trade pkt. 50c; $\frac{1}{8}$ oz. \$1.50; $\frac{1}{4}$ oz. \$2.50.

Be sure to grow every one of these 1948 Winners in your garden.

Three Outstanding Floribunda Roses

These Floribunda Roses represent a very important class for garden planting yet they also are excellent for cutting. Unlike the Hybrid-Tea Roses the flowers are borne in showy large clusters which give them their superb display value. In addition they bloom without interruption from early summer until hard frost arrives in late fall.

Cecile Brunner. This also is known as the Fairy or Sweetheart Rose. It is a dainty variety with small double blooms of perfect form arranged in graceful many-flowered sprays. The color of the flowers is rosy pink on a creamy white ground. 70c each; 10 or more, 65c each.

Improved Lafayette. Brilliant flowers of medium size borne most abundantly on sturdy plants. The deep glowing red blooms are vividly suffused with crimson and the large clusters give an impressive garden display. Also fine for cutting. 70c each; 10 or more, 65c each.

Rosenelfe

Rosenelfe. A very delightful extra free-blooming Floribunda Rose with well-rounded Gardenia-like flowers of glowing pink with a silvery reflex. The flowers are fully double to the very center and they are produced all summer long. 70c each; 10 or more, 65c each.

Four Magnificent Hardy Climbing Roses

The four varieties offered here have proved the most desirable from every standpoint. They are free-blooming, vigorous, and hardy, bearing a prodigious quantity of large attractive blooms during their respective seasons. They are indispensable where climbing plants with showy flowers are needed in the garden picture.

Paul's Scarlet Climber. The best known of all climbing roses with vivid scarlet blooms completely covering the plants in June. Each cluster is composed of from 3 to 20 large double flowers. 70c each; 10 or more, 65c each.

Blaze. (Plant Patent #10.) Closely resembles Paul's Scarlet Climber but unlike that popular variety it produces blooms recurrently all during the summer and fall which is an added feature. \$1.00 each; 10 or more, 90c each.

City of York. An exceptionally beautiful new climbing rose with magnificent white blooms. Of vigorous growth and therefore able to cover a large area. A most profuse variety with the plants covered during May and June from top to bottom with graceful 3-inch blooms of semi-double to double form. The enchanting fragrance also deserves special mention. \$1.00 each; 10 or more, 90c each.

Mme. Gregoire Staechelin. (Spanish Beauty.) Well known as a most desirable climbing rose. Of strong growth and very hardy with large, semi-double, fragrant flowers of an iridescent pearly pink tipped with light crimson. The showy large blooms are borne in clusters on stems measuring 12 to 14 inches long. 70c each; 10 or more, 65c each.

New Hybrid SWEET CORN – 346 Erie

Honorable Mention 1947 All America Selection

A beautiful quality Hybrid Sweet Corn with long, slightly tapering, cylindrical ears set with 12 or 14 rows of attractive kernels. The plants are wilt-resistant, vigorous, and relatively resistant to drought. They are adapted to widely different growing conditions. As compared with Golden Cross Bantam, this Hybrid produces plants which are 6 inches taller and bear their ears 4 inches higher on the stalk. The ears mature 3 or 4 days later. It always has outyielded Golden Cross Bantam. The kernels are decidedly narrower than those of Golden Cross Bantam which adds to the attractiveness of the ears and facilitates eating from the cob. Actual canning tests have proved its excellent quality for this purpose. 1 to 4 lbs., 55c per lb.; 5 to 29 lbs., 49c per lb.; 30 to 99 lbs., 47c per lb.; 100 lbs. or more 45c per lb., not prepaid.

VEGETABLE SEEDS

Dreer Quality for Market Gardeners

Every successful market grower realizes the tremendous importance quality seeds play in the production of profitable crops. The market gardener who makes his livelihood from the sale of the produce grown cannot afford to sow seeds of doubtful value. He must have highly bred strains carefully selected from vigorous parent plants that show all the typical characteristics of the true variety. They must be full of vigor and vitality to make a sturdy growth from the start. For over a century market growers have realized that they can depend on Dreer's to supply them with the finest in Vegetable Seeds. The prices quoted are subject to change without notice.

Vermiculite

This material has received considerable attention since its introduction not so long ago. Pellets of mica rock are expanded under high heat which separates the thin mica sheets and produces a light, fluffy material which is altogether inert and therefore does not contain any harmful micro-organisms and, of course, there are no weed seeds. Once it has become saturated with water it represents an excellent material for starting seeds and rooting cuttings. It also has special value for lightening heavy soil. A large number of air spaces between the expanded mica gives it outstanding merits for mulching purposes. Although it retains moisture for an exceptionally long time, it nevertheless provides plenty of air spaces which are so important for good root growth. 1/2 bu. 85c; 2 bu. \$1.75.
